#### **Plant Protection**

by Dr. Ah. Hassanein El-Kifl

Plant Protection Section, Agricultural College, Cairo University

The losses due to plant diseases in Egypt amount annually to 40 million pounds. The efforts of man to raise more & better crops are counter acted by the various pests attacking them. Old pests become more prevalent & new pests appear. Greater efforts are necessary to aid research, dissemination of knowledge & the availability of insecticides. The general outlines of such a policy are discussed.
